Announcing WeChat and LINE for all applications

WeChat and LINE are now supported as new social messaging channels, in addition to WhatsApp. Please contact your Account Manager to learn more.

What's new with MultiLine for Intune?

Improvements to end-user activation flow

When end-users install MultiLine apps, they must complete the activation process before they begin using them. The new process is far more streamlined, reducing the time and effort required by end-users to activate the app. It will not require scanning a QR code, or entering the username and password credentials. Optionally, at customer request, retrieving an OTP PIN code can be disabled.

WhatsApp icon fix (v. 3.6.2)

The WhatsApp icon was displayed in contact cards for users who did not have WhatsApp enabled. This has been fixed.

Intune iOS SDK Update (v. 3.6.2)

We updated to the Intune iOS SDK (17.2.0) for Multiline for Intune app.

Country code fix (v. 3.6.3)

Some users noticed that an additional country code was being incorrectly prepended when sending a message to an international destination. This has been fixed.

Intune iOS SDK Update (v. 3.6.4)

We updated to the Intune iOS SDK (17.4.0) for Multiline for Intune app.

Performance and reliability enhancements

Movius for BlackBerry iOS v. 3.06.02, Movius MultiLine iOS v. 3.06.02, MultiLine for Intune iOS v. 3.06.05

Movius uses SIP ping requests to detect connectivity status from the MultiLine application to the Movius Platform. We are moving the handling of these SIP pings from the firewall to the Session Border Controller (SBC). We're doing this because the SBC is better able to handle this traffic. There will be no detectable impact for users.

Label configuration option for Home 2

Movius for BlackBerry iOS v. 3.06.03 and Movius for BlackBerry Android v. 3.06.02

The Movius for BlackBerry application offers fields for categorizing phone numbers, such as Home, Home 2, Work, Work 2, Mobile, etc. Now, MultiLine admins can configure the "Home 2" contact label to display as "MultiLine" instead, so that users will more easily be able to identify their contact's MultiLine number.

Bug Fixes

ID	Description
CS-232971	User reported an issue on Movius for BlackBerry using click-to-text from BlackBerry Work. This has been fixed in Movius for BlackBerry iOS v. 3.06.02.
None	MultiLine notifications were not showing the relevant information for calls and messages. This has been fixed in Movius for BlackBerry iOS v. 3.06.04
CS-233004, CS-233006	Some users would see an intermittent Intune authentication error. This has been fixed in MultiLine for Intune iOS v. 3.06.06
