

# Version 4.02.01 | Release Notes

Last Modified on 05/15/2024 4:32 pm EDT

# Movius Android App v. 4.02.01 Release Notes

We update MultiLine applications quarterly with new features and improvements. To stay up to date and make the most of your MultiLine experience, please read on and learn what's new with the MultiLine, MultiLine for Intune, and Movius for BlackBerry apps.

## **Production Deployment Schedule**

- MultiLine for Intune Android v. 4.02.01 | May 12, 2024
- Movius MultiLine Android v. 4.02.01 | May 29, 2024

### What's New?

#### **Compose Social Message**

When users of the social messaging feature select compose new message feature, they will now be able to select what type of message they want to send, SMS or social message. There is no functionality change for users that do not have social messaging enabled.

#### **Call Ringing and Notification Control**

Users who sync their MultiLine calls with Microsoft Teams app, will now have the option to silence the ring on the MultiLine app so that both apps don't ring for incoming calls simultaneously. For the best calling experience, we recommend users that receive calls on the Microsoft Teams mobile app to silence ringing in MultiLine.

When users activate MultiLine, or when Microsoft Teams calling is enabled for the first time, users will see a notification giving them the option to turn it off. If the user changes their mind later, they can change it in their Call Settings. See <u>Control MultiLine ring when using Teams</u> (<u>https://help.moviuscorp.com/help/silence-multiline-ring-when-using-teams-ios</u>)
