

# Enable Microsoft Teams calling for a user

Last Modified on 04/15/2024 4:57 pm EDT

Read on to learn about how to enable Microsoft Teams calling for a user.

## Overview

With the MultiLine integration for Microsoft Teams, users can make and receive calls using their MultiLine number directly within the Calls app in Microsoft Teams.

## Before you start

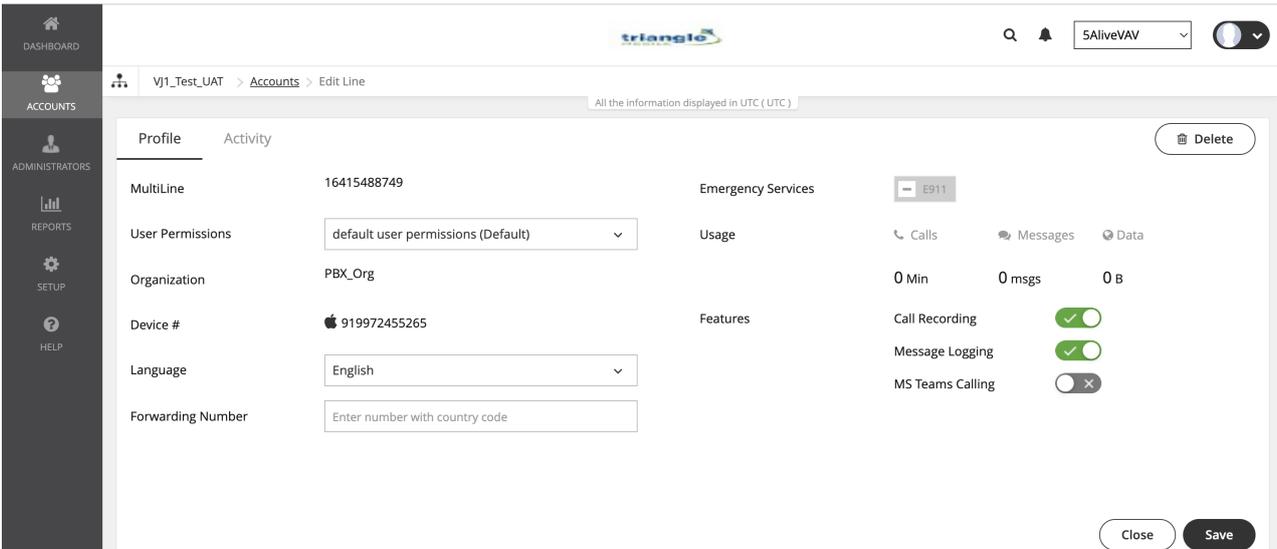

- Movius must turn on Microsoft Teams for your organization for the feature to be available.
- An admin must have "Accounts" Privilege in their Role in the organization to do these instructions. See [What Admin Privileges are in Management Portal?](#) <https://help.moviuscorp.com/help/what-admin-roles-mmp/>

## Set up Microsoft Teams calling for user

MultiLine Administrators can set this up for users on their Accounts page. For new users, this is done when adding a user. For current users, this is done by editing the account.

On the accounts page, use the toggle to turn MS Teams Calling on.

- When off, a grey x  will be visible on the toggle and the user will not be able to use Microsoft Teams calling.
- When on, a green checkmark  will be visible on the toggle and the user will be able to use Microsoft Teams calling.

The screenshot shows the 'Edit Line' page for a user named 'VJ1\_Test\_UAT'. The page is divided into several sections:

- Profile:** MultiLine (16415488749), User Permissions (default user permissions (Default)), Organization (PBX\_Org), Device # (919972455265), Language (English), Forwarding Number (Enter number with country code).
- Emergency Services:** E911.
- Usage:** Calls (0 Min), Messages (0 msgs), Data (0 B).
- Features:** Call Recording (checked), Message Logging (checked), MS Teams Calling (unchecked).

At the bottom right, there are 'Close' and 'Save' buttons. A 'Delete' button is also visible in the top right corner of the main content area.
